

DATA. PROCESS. STANDARD.

CleanScape — Commercial & Growth Overview

Services, customers, competitive position,
marketing stage, technology, team and growth
objectives for the Birmingham launch market.

PRE-LAUNCH · BUILD PHASE
LAUNCH MARKET · BIRMINGHAM
SECTIONS 2 TO 9

What this document covers

02 Services & Offerings

Residential, moving home, short lets, commercial, CleanScape Recovery, cleaning levels, add-ons, recurring cleaning, pricing, service area, trust

03 Target Customers

B2C groups, B2B customers, initial personas, pain points, feedback plan

04 Competitive Landscape

Competitor categories, our difference, competitor research

05 Current Marketing & Sales

Stage, brand and social, website, local search, booking journey, lead volume

06 Technology, Tools & Access

Current position, planned Zoho One implementation, what the stack should achieve

07 Team

Five core functions and how they work together

08 Growth Objectives

Birmingham, month one, three-month target, marketing budget

09 What Success Looks Like

Performance framework, the growth challenge, the opportunity

02 Services & Offerings

CleanScape has been designed around a simple principle:

People shouldn't have to search through dozens of confusing cleaning options to figure out what they need.

Our services are organised around the reason the customer needs cleaning, with enough flexibility to personalise the booking where necessary.

SERVICE FAMILIES

Residential Cleaning

For customers who want help maintaining or refreshing their home.

Regular Cleaning

Our everyday maintenance service for customers who want their home consistently looked after.

Designed particularly for repeat bookings such as:

WEEKLY

FORTNIGHTLY

OTHER RECURRING SCHEDULES

The intention is to make repeat cleaning progressively easier, so customers don't have to rebuild the same booking every time.

Deep Cleaning

For homes that need significantly more attention than a normal maintenance clean.

This provides a more intensive service for areas where dirt, dust, grease, limescale or grime have accumulated and additional time and detail are required.

One-Off Cleaning

For customers who need cleaning on a particular occasion without committing to an ongoing schedule.

This could be before visitors arrive, after hosting, during a particularly busy period or simply because the customer wants the home refreshed.

Moving Home

Moving already comes with enough to organise. Cleaning shouldn't be another complication.

End-of-Tenancy Cleaning

For tenants, landlords and property managers preparing a property for inspection, handover or its next occupant.

Move-In Cleaning

For customers who want their new home properly cleaned before they settle in.

Move-Out Cleaning

For customers who want to leave a property clean and ready for whoever comes next, without necessarily requiring a formal end-of-tenancy service.

Airbnb & Short Lets

Designed for customers whose properties need to be consistently ready for the next guest.

Airbnb Cleaning

Cleaning and property reset between guest stays.

Holiday Let Cleaning

Repeat cleaning for holiday accommodation around guest changeovers.

Serviced Accommodation Cleaning

Designed particularly for professional operators and property managers running one or multiple short-stay properties.

The opportunity here goes beyond individual bookings.

Our aim is to build recurring relationships where CleanScape becomes part of the operator's normal property-turnaround process.

Commercial Cleaning

For businesses and organisations requiring dependable cleaning without having to continually source individual cleaners.

Our current planned commercial categories are:

- Office Cleaning

- Retail & Hospitality Cleaning

- Educational Facility Cleaning

- Communal Area Cleaning

Commercial services can be structured around the customer's operational requirements, including one-off and recurring arrangements.

NOT IN INITIAL SCOPE

CleanScape will not initially provide specialist post-construction cleaning or commercial/exterior window cleaning.

A DISTINCTIVE PROPOSITION

CleanScape Recovery

Cleaning that adapts when life does.

CleanScape Recovery was developed because we recognised that standard cleaning isn't suitable for every circumstance.

It provides a more personalised cleaning experience for customers who may need greater consideration around how their cleaning is delivered.

Our planned Recovery categories include:

- Pregnancy Support Cleaning

- Postpartum Cleaning

- Older-Person Household Cleaning Support

- Injury Recovery Cleaning

- Illness Recovery Cleaning

- Hospital Discharge Home Cleaning

- Bereavement Support Cleaning

Customers may be able to communicate relevant preferences such as products they prefer, products they want avoided, fragrance preferences, priority areas and household-specific cleaning instructions.

WHAT RECOVERY IS NOT

CleanScape Recovery remains a cleaning service. It does not provide healthcare, nursing or personal care.

Its purpose is simple:

Different circumstances. Different needs. A cleaning experience that understands that.

Cleaning Levels

Where appropriate, CleanScape uses cleaning levels to help establish the intensity of work required.

Essential

Routine maintenance cleaning for a generally maintained property.

Enhanced

More detailed cleaning where additional attention and time are required.

Comprehensive

An intensive level of cleaning for properties requiring considerably greater attention.

The service determines **what is being cleaned**.

The level helps determine **how much cleaning is required**.

Add-Ons

Rather than turning every additional requirement into another service, eligible bookings can be personalised through add-ons.

Planned examples include:

Interior window cleaning

Inside oven

Inside fridge

Inside cupboards

Other service-specific extras

Interior window cleaning will therefore be an **add-on only**.

We do not currently intend to offer standalone, exterior or commercial window cleaning.

Recurring Cleaning

Repeat business is an important part of the CleanScape model.

Where appropriate, customers will be encouraged to move from individual transactions towards regular cleaning. Examples include:

One-Off

Weekly

Fortnightly

Custom Recurring Schedule

The longer-term product experience should make repeat bookings easier by remembering relevant property details and customer preferences.

The objective is that once someone finds a cleaning experience that works for them, they shouldn't need to start searching again.

Pricing Structure

Our final customer-facing rate card is currently being developed.

Pricing research has already been undertaken across competitors, property sizes, cleaning categories, estimated cleaning durations and different cleaning levels.

The pricing model is being designed around variables including:

The customer experience we are working towards is transparent:

Tell us what you need → See what it costs → Decide whether to book.

We do not want customers to have to submit an enquiry simply to discover the basic cost of an eligible standard service.

Commercial or unusually complex requirements may require a different quotation process.

Final pricing will be confirmed before launch.

Birmingham

Our initial launch market is **Birmingham**.

Rather than spreading operational capacity too thinly across the UK from day one, our immediate objective is to build sufficient customer demand and cleaner availability within Birmingham.

This is important to the marketplace model.

A large geographic footprint means very little if a customer opens CleanScape and cannot find suitable availability.

As the Birmingham marketplace develops, expansion into additional locations can follow based on demand, cleaner supply and operational performance.

Our long-term ambition is significantly broader than Birmingham, but expansion should be earned through successful marketplace performance rather than geography being added simply for marketing purposes.

Density before distance

We would rather build density before distance.

Trust, Safety & Compliance

Trust is one of the reasons CleanScape exists.

Our cleaner onboarding and customer-protection framework is therefore being developed as part of the platform rather than treated as an afterthought.

Areas being considered and/or developed include:

01 Identity verification

02 Right-to-work/eligibility checks where applicable

03 Appropriate background/vetting processes

04 Cleaner onboarding standards

05 Service standards

06 Health and safety procedures

07 COSHH-related processes where applicable

08 Appropriate insurance arrangements

09 Customer issue and
complaint procedures

10 Incident reporting

11 Platform accountability

12 Cleaner performance/review systems

We will only advertise specific certifications, DBS status, insurance limits or accreditations once they are formally in place and can be evidenced.

This is particularly important for CleanScape because we do not want “**trusted**” to become an empty marketing word.

We want customers to understand what CleanScape actually does to earn that trust.

03 Target Customers

CleanScape isn't being built for one narrow demographic.

It is being built around situations where people value their time, convenience and confidence in who is entering their property.

Broadly, our market is divided between B2C and B2B customers.

B2C — Residential Customers

Potential customer groups include:

Busy Professionals

People who have the ability to clean their homes but would rather spend their limited free time elsewhere.

Their primary purchase isn't necessarily cleaning.

It's time.

Families

Households balancing work, children, appointments and everyday responsibilities.

The pain point is often not knowing *how* to clean.

It's finding the time to keep doing it consistently.

Customers Seeking Greater Peace of Mind

People who are uncomfortable finding an unknown cleaner through an online listing or social-media advertisement and want greater accountability around the booking.

People Moving Home

Tenants, homeowners and others dealing with an already stressful transition who want the cleaning handled.

Customers Experiencing Changing Circumstances

This is particularly relevant to CleanScape Recovery:

Pregnancy

Postpartum households

Older people

Injury recovery

Illness recovery

Returning home after hospital

Bereavement

Their requirements may extend beyond a standard cleaning checklist.

B2B Customers

Airbnb & Short-Let Hosts

Their problem is different from that of a normal household. They need:

Reliability + Turnaround
+ Consistency

because another customer may be arriving shortly afterwards.

Serviced Accommodation Operators

Particularly attractive because one relationship can potentially generate recurring bookings across several properties.

Property Managers & Landlords

Potential requirements include:

- End-of-tenancy cleaning
- Move-in cleaning
- Move-out cleaning
- Communal areas
- Recurring property requirements

Offices & Businesses

Organisations looking for dependable recurring cleaning without continually managing individual cleaners.

Six starting segments, and the question each one asks

Our customer personas will continue to develop as we collect real behavioural data, but our starting segments include:

“Give Me My Time Back”

A busy customer who doesn't want to spend evenings or weekends cleaning.

“Can somebody just take care of this for me?”

“Can I Trust Who I'm Letting In?”

A customer who values security and accountability.

“Who exactly am I allowing into my home?”

“I Need Someone Soon”

A customer whose priority is availability.

“Can somebody come when I actually need them?”

“Please Remember How I Like It”

A recurring customer who values consistency and personal preferences.

“Why should I explain the same things every time?”

“My Circumstances Have Changed”

A CleanScape Recovery customer.

“Can the service work around what I need right now?”

“My Next Guest Is Coming”

An Airbnb/short-let operator.

“Can I depend on the property being ready?”

These questions are important because our marketing should answer them rather than simply saying:

“Professional cleaning services available.”

Customer Pain Points

The problems we are building CleanScape around include:

Trust

Uncertainty about who is entering the property.

Availability

Difficulty finding someone at the required time.

Too Much Coordination

Calls, messages, quotations and repeated follow-ups.

Inconsistent Quality

Different interpretations of what a particular cleaning service includes.

Repeating Yourself

Regular customers repeatedly communicating the same property and cleaning information.

Accountability

Limited support when booking an independent cleaner and something goes wrong.

Reliability

Cleaners cancelling, arriving late or failing to turn up.

Unclear Pricing

Not knowing what something will cost without contacting multiple providers.

Lack of Personalisation

Standard services that don't account for individual preferences.

Time

The entire reason someone wants a cleaner can be undermined by how much effort it takes to organise one.

Customer Feedback & Testimonials

CleanScape is currently pre-launch.

We therefore do **not yet claim established CleanScape customer reviews or testimonials.**

This is an important distinction.

One of our launch objectives will be to acquire genuine early customers, understand their experiences and systematically collect verified feedback.

We want the first customers to help us answer:

What worked?

What created friction?

Would you book again?

Would you recommend CleanScape?

What nearly stopped you from booking?

Their feedback should influence Product, Operations, Marketing and Customer Experience.

04 Competitive Landscape

CleanScape is entering an established market.

We are not assuming customers currently have no options. They do.

Our competitors include:

Direct Cleaning Marketplaces & Platforms

Businesses such as Wecasa and other technology-enabled home-service/cleaning platforms.

National Cleaning Companies

Established cleaning brands operating across multiple UK locations.

Local Cleaning Companies

Birmingham-based residential and commercial cleaning businesses.

Independent Cleaners

An extremely important competitor category.

Customers can find individual cleaners through:

Search engines

Directories

Social platforms

Community groups

Recommendations

Word of mouth

In many cases, the independent cleaner may be cheaper.

CleanScape therefore needs to provide a compelling reason for a customer to book **through the platform** rather than bypass it.

Our intended competitive advantage isn't one feature

It's the combination of:

01 Trust

A more structured relationship between customer, platform and cleaning professional.

02 Convenience

A booking journey designed to remove searching, chasing and unnecessary coordination.

03 Reliability

Building sufficient marketplace supply and operational infrastructure to fulfil customer requirements consistently.

04 Personalisation

Allowing cleaning to better reflect the customer's property, preferences and circumstances.

05 CleanScape Recovery

A distinctive proposition built around customers whose circumstances may require a more considerate cleaning experience.

06 Technology

Using the platform to improve matching, booking, communication, customer management, reviews, rebooking and ultimately the entire cleaning journey.

Our ambition isn't to win because:

“Our cleaners clean better than everybody else's cleaners.”

That is difficult to defend.

We want to win because:

The entire experience of getting cleaning sorted is better.

Competitor Research

Competitor research has already formed an important part of CleanScape's development.

Wecasa has been one of our key benchmarks, alongside research into other cleaning companies and platforms.

Research undertaken includes areas such as:

Pricing	Service categories	Cleaning duration
Cleaner models	Worker agreements	Booking experience
Customer journey	Cleaner onboarding	Marketing
Sustainability positioning	Platform tools	Commercial cleaning opportunities
Service limitations	Customer experience	

We do not intend simply to copy an existing competitor.

The purpose of competitor research is to understand:

What already works?	What frustrates customers?
What is missing?	Where can CleanScape create a meaningfully better experience?

05 Current Marketing & Sales

Current Stage

CleanScape is currently in its **pre-launch/build phase**.

This distinction is important when assessing marketing performance.

We do not yet have a mature historical acquisition engine or established sales funnel to optimise. We are building them.

Brand & Social Media

CleanScape has begun developing its:

Brand identity

Visual direction

Social-media strategy

Content direction

Campaign concepts

Launch communications

Social-media accounts exist and the relevant links/access will be provided separately.

Our intended social direction is:

Premium but approachable.

**Professional without
being corporate.**

**Playful without
becoming unserious.**

**Distinctive rather than looking like
another generic cleaning page.**

Content should sell the outcomes people care about:

Time. Relief. Convenience. Trust. A clean space.

—not simply photographs of cleaning equipment.

Website

A CleanScape website is already in place/development and access/link details will be provided separately.

The website will play an important role in:

- Explaining the proposition
- Presenting services
- Building trust
- Converting traffic
- Supporting bookings
- Capturing leads
- Supporting SEO
- Connecting marketing campaigns to the customer journey

Google Business Profile

CleanScape does **not currently have a Google Business Profile.**

Establishing the appropriate local-search presence is therefore part of the pre-launch marketing work.

The intended journey, end to end

Because the marketplace is still being built, CleanScape does not yet have a mature historical booking process. The intended journey is:

Marketing needs to be connected to this entire journey rather than measured only by impressions or followers.

Lead Volume & Conversion

Because CleanScape is pre-launch, we do not yet have meaningful historical:

Monthly lead volume

Customer acquisition cost

Website-to-booking conversion

Repeat-booking rate

Cancellation rate

Lifetime value

Marketing-channel conversion rates

These will become core performance metrics after launch.

The absence of this data is not something we should hide.

Our first months will establish the baseline.

06 Technology, Tools & Access

Current Position

CleanScape currently has:

Website	● Yes
Social Media	● Yes
Google Business Profile	● Not yet
Dedicated CRM	● Not yet
Integrated marketing/operations platform	● Being implemented

Planned Zoho One Implementation

CleanScape is currently in discussions with the Zoho team regarding implementation of **Zoho One** as a significant part of our internal business infrastructure.

Rather than assembling a large number of disconnected systems, the intention is to use an integrated ecosystem wherever it makes operational sense.

Zoho One currently brings together more than 40 integrated business applications spanning areas such as sales, marketing, finance, support, HR, collaboration, analytics and business-process automation.

Our implementation requirements are still being defined, so not every available Zoho application will necessarily be activated from day one.

The areas particularly relevant to CleanScape include:

CUSTOMER & SALES MANAGEMENT

Zoho CRM

For managing leads, customers, opportunities and the customer lifecycle.

WEBSITE ENGAGEMENT

Zoho SalesIQ

Potentially supporting website visitor engagement and customer conversations.

CUSTOMER SUPPORT

Zoho Desk

For structured customer enquiries, issues and support tickets.

ANALYTICS

Zoho Analytics

For bringing together business and marketing performance data.

MARKETING

Tools such as:

Zoho Campaigns

Email campaigns and customer communications.

Zoho Social

Social-media management.

Zoho Forms

Lead capture and information collection.

Zoho Survey

Customer feedback and research.

FINANCE

Relevant Zoho finance applications can support areas such as accounting, billing, invoicing and expenses.

COLLABORATION & OPERATIONS

The wider ecosystem also contains applications for file management, communication, project management, digital signatures, meetings, workflow automation and other operational requirements.

The objective isn't:

“Use as many Zoho applications as possible.”

The objective is:

Create one connected operating system for CleanScape wherever possible.

We want customer information to flow through the business rather than being trapped in disconnected spreadsheets, inboxes and individual applications.

Understanding the complete customer journey

Ultimately, our systems should help us understand the complete customer journey:

01 **Where did this person discover CleanScape?**

02 **What did they click?**

03 **Did they enquire or book?**

04 **What service did they purchase?**

05 **How much did they spend?**

06 **Were they satisfied?**

07 **Did they book again?**

08 **What is that customer worth over time?**

That data should then inform Growth, Operations, Product and Customer Experience.

07 Team

CleanScape is intentionally lean at this stage.

The current/planned core team consists of approximately five functions:

01 **Founder / Managing Director**

Coordinates the overall business and is responsible for vision, strategic direction and major decisions.

02 **Developer**

Responsible for the technical development of the CleanScape platform and associated technology.

03 **Graphic / Motion Designer**

Responsible for visual creative, graphics, motion/video assets and supporting the visual execution of campaigns.

04 **Growth Lead**

CURRENTLY BEING RECRUITED

Currently being recruited/onboarded.

This person will be responsible for helping shape and execute the overall growth direction rather than simply managing advertisements.

05 **Social Media Manager**

Responsible for managing CleanScape's social presence, content execution, community activity and maintaining the required brand standard across social channels.

At this stage, collaboration will be close.

WE DON'T WANT

Founder → Marketing → Designer
→ Developer
operating as isolated silos.

WE WANT

Strategy ↔ Growth ↔ Creative ↔
Technology ↔ Social ↔ Operations
working as one system.

08 Growth Objectives

Launch Market: Birmingham

Birmingham is our initial proving ground.

The objective is not simply to generate awareness.

We need to prove that we can repeatedly:

Acquire Customers

Fulfil Bookings

Deliver a Good Experience

Generate Reviews

Create Repeat Behaviour

MONTH ONE

100+

Initial target: 100+ users/customers

The first month should establish initial demand, generate real customer feedback and begin producing the behavioural data needed to understand acquisition and conversion.

THREE-MONTH TARGET

1,000

Ambition: 1,000 acquired users in Birmingham.

This is an ambitious early-stage target and should be treated as a measurable growth objective rather than an assumption.

The goal is not simply to report:

“We reached 100 people.”

We need to understand:

Where did they come from?

How many booked?

What did acquisition cost?

Which service did they choose?

Did they complete the booking?

Were they satisfied?

Did they return?

Working backwards from the target

The Growth team will need to determine:

What counts as an acquired user?

A registered account?

A qualified lead?

A first-time paying customer?

We should define this before launch.

For commercial purposes, **paying customers** should be tracked separately from registrations and leads.

Our Birmingham strategy should therefore work backwards from the target:

1,000 Customers

Required bookings

Required qualified leads

Required website visitors

Required reach/impressions

Required marketing investment

That turns the target into a growth model rather than simply a number we hope to achieve.

Marketing Budget

Our provisional launch/growth marketing budget is approximately:

£5,000,000 – £7,500,000

This budget should not automatically be treated as an advertising budget alone.

The Growth Lead should help determine the appropriate allocation across areas such as:

Every significant spend should ultimately connect to measurable business outcomes.

The question isn't:

“How much engagement did the campaign get?”

The more important question is:

“What did the campaign make happen?”

09 What Success Looks Like

In the early stages, CleanScape should resist becoming obsessed with vanity metrics.

Followers matter.

Reach matters.

Video views matter.

But only when they contribute to the marketplace.

Our core performance framework should progressively track:

Awareness

Reach · Brand searches · Website traffic

Acquisition

Leads · Registrations · First bookings · Customer acquisition cost

Conversion

Website-to-booking rate · Lead-to-booking rate · Checkout completion

Marketplace

Cleaner availability · Booking acceptance · Fulfilment rate · Cancellation rate · On-time performance

Experience

Customer rating · Complaints/issues · Review volume · Customer satisfaction

Retention

Repeat booking rate · Recurring customers · Booking frequency · Customer lifetime value

Growth

Revenue · Gross booking value · Acquisition efficiency · Month-on-month customer growth

The Growth Challenge

CleanScape is not launching a normal e-commerce business.

It is launching a **two-sided marketplace**.

That means customer acquisition alone cannot define success.

We need enough customers.

And we need enough suitable cleaning professionals available at the right locations and times to fulfil those bookings.

Too much demand without supply
creates disappointed customers.

Too much supply without demand
creates cleaning professionals with no
reason to stay active.

So our growth strategy must continuously balance:

DEMAND ↔ SUPPLY

That is one of the most important principles for anyone working on CleanScape to understand.

THE OPPORTUNITY

We're entering a market where cleaning itself isn't new.

That's exactly the point.

We're not trying to convince people that their homes and businesses need cleaning. The demand already exists.

Our job is to answer a different question:

Why should someone use CleanScape instead of the way they're already getting cleaning done?

Our answer needs to be felt throughout the entire experience:

Because it's easier.

Because there's greater accountability.

Because it fits around you.

Because you can depend on it.

And ultimately:

Because once you've booked, you can relax.
It's handled.
