

CLEANSCAPE SMART SERVICE RECOMMENDATION ENGINE

Functional Specification (Developer)

Objective

The purpose of this feature is to simplify the customer's booking journey while ensuring they are matched with the most appropriate cleaning service.

Rather than expecting customers to understand the differences between various cleaning services and cleaning standards, CleanScape will intelligently guide them throughout the booking process.

The recommendation engine is designed to:

- Reduce customer confusion.
 - Improve booking accuracy.
 - Reduce disputes caused by incorrect service selection.
 - Increase customer confidence.
 - Maintain a simple booking experience.
-

BOOKING FLOW

The booking journey should follow this structure.

Choose Service Category

Choose Service

Choose Cleaning Standard

Property Questions

Smart Recommendation

Add-ons

↓
Property Details

↓
Date & Time

↓
Checkout

STEP 1

Choose Service Category

Example:

Residential Cleaning

Commercial Cleaning

Short-Term Rental Cleaning

Exterior Cleaning

CleanScape Recovery

STEP 2

Customer chooses a specific service.

Example

Residential Cleaning

↓

Regular Cleaning

Deep Cleaning

End of Tenancy Cleaning

Move-In Cleaning

Move-Out Cleaning

One-Off Cleaning

STEP 3

Customer chooses the Cleaning Standard.

Every service should display three standards.

Essential

Routine cleaning.

Suitable for properties that are already well maintained.

Enhanced

A more detailed clean.

Additional attention is given to high-use and overlooked areas.

Comprehensive

The highest level of cleaning.

Ideal for heavily used properties or customers wanting a complete property refresh.

IMPORTANT

Every service has a **Recommended Standard**.

This recommendation is shown immediately underneath the service title.

Example

Regular Cleaning

 Recommended Standard

Essential

Deep Cleaning

 Recommended Standard

Enhanced

End of Tenancy Cleaning

 Recommended Standard

Comprehensive

SERVICE RECOMMENDATION MATRIX

Service	Recommended Standard
Window Cleaning	Essential

CleanScape Recovery

Service	Recommended Standard
Pregnancy Support Cleaning	Enhanced
Postpartum Home Cleaning	Comprehensive

Illness Recovery Cleaning	Comprehensive
Post-Injury Home Cleaning	Comprehensive
Hospital Discharge Home Cleaning	Comprehensive
Bereavement Support Cleaning	Enhanced

PROPERTY CONDITION QUESTIONS

After selecting a cleaning standard, the customer should answer a small number of simple questions.

Example

How would you describe the current condition of your property?

- ☐ It is cleaned regularly.
 - ☐ It needs a little extra attention.
 - ☐ It hasn't been cleaned for quite some time.
-

Have you recently moved into or out of the property?

Yes

No

Are there any areas requiring special attention?

Checkboxes

Kitchen

Bathroom

Windows

Bedrooms

Living Areas

Other

These questions are not intended to replace the booking.

They are intended to improve recommendations.

SMART RECOMMENDATION ENGINE

The recommendation engine compares:

Selected Service

-

Selected Standard

-

Property Condition

Then determines whether the booking appears suitable.

Example 1

Customer chooses

Regular Cleaning

↓

Comprehensive

↓

Property condition

"It hasn't been cleaned for months."

CleanScape displays:

Recommendation

Based on the information provided, **Deep Cleaning** may be more suitable for your property.

Deep Cleaning is specifically designed for homes requiring a more thorough clean.

Buttons

Continue with Regular Cleaning

or

Switch to Deep Cleaning

Example 2

Customer chooses

End of Tenancy Cleaning

↓

Essential

System displays

End of Tenancy Cleaning is delivered exclusively to our **Comprehensive Standard** to meet landlord and letting agent expectations.

The cleaning standard has automatically been updated.

USER EXPERIENCE PRINCIPLES

The system should never display messages such as:

✗ Wrong choice

✗ Invalid option

✗ You selected incorrectly

Instead use helpful guidance.

Examples

✓ We recommend...

✓ Based on your selections...

✓ A better option may be...

✓ Most customers in your situation choose...

The recommendation engine should always feel like professional advice rather than an upsell.

AUTOMATIC STANDARD CHANGES

Certain services should always use a fixed cleaning standard.

Example

End of Tenancy Cleaning

↓

Automatically uses

Comprehensive

The customer cannot downgrade.

The same applies to:

Move-In Cleaning

Move-Out Cleaning

Postpartum Cleaning

Hospital Discharge Cleaning

This ensures service quality remains consistent.

FUTURE AI RECOMMENDATION

In a future version, the recommendation engine can be enhanced using AI.

Customers may upload photographs of their property before booking.

The AI can assess:

- General cleanliness
- Dust build-up
- Stains
- Grease
- Limescale
- Clutter level
- Visible mould
- High-traffic areas

The system can then automatically recommend:

- The most suitable cleaning service.
- The most appropriate cleaning standard.
- Estimated cleaning duration.
- Number of cleaners required.
- Suggested add-on services.

This should be developed as a future enhancement and is not required for the MVP.
