

Office Cleaning — booking and pricing logic

The customer states what spaces they have and how thoroughly they want them cleaned. CleanScape calculates the cleaning work required, allocates cleaners, then prices the job. The customer never calculates hours.

All times = ONE cleaner

Cap 5 hrs per cleaner per job

Billing follows cleaner-hours, not duration

+ Add another space

Per space: quantity, then size

CUSTOMER · 03-04

How many do you have?

Quantity · e.g. Office areas 3, Meeting rooms 2

What size is each one?

Small

Medium

Large

Not sure

Approximate m² bands are shown beside each option. Not sure? That's okay — we'll estimate it for you.

SYSTEM · CALCULATION

1 · Look up time from the matrix (space type × size × level)

2 · Quantity × time per space

3 · Sum every space

OUTPUT

Total cleaner-hours

The work one cleaner would take to do the whole job. Not the number of cleaners sent, and not the elapsed duration.

DECISION

Is the total 5 cleaner-hours or less?

YES

1 cleaner

NO

Total ÷ 5, rounded up

SYSTEM · SCHEDULING

Estimated job duration = total cleaner-hours ÷ number of cleaners

Add-ons

PRICING ENGINE

Total cleaner-hours × applicable rate + add-ons = customer price

Commercial hourly rates are not yet set.

Booking confirmed

ALLOCATION DOES NOT REDUCE BILLABLE HOURS

A job of 8 cleaner-hours is allocated 2 cleaners × 4 hours. The visit takes about 4 hours, but the customer is purchasing 8 cleaner-hours. Price is never calculated from the elapsed duration.

HOW "NOT SURE" RESOLVES

The customer never has to measure

CleanScope averages the Medium and Large times for that space and level, then rounds up to the nearest 5 minutes. It happens in the background.

Medium 30 min + Large 45 min → avg 37.5 → 40 min

Worked for an Enhanced office / work area.

AUTOMATIC CLEANER ALLOCATION

No cleaner is given more than 5 hours on one job

```
cleaners = ceil(total cleaner-hours ÷ 5)
duration = total cleaner-hours ÷ cleaners
```

REQUIREMENT	CLEANERS	APPROX. DURATION
1–5 hrs	1	1–5 hrs
6 hrs	2	3 hrs each
8 hrs	2	4 hrs each
10 hrs	2	5 hrs each
11 hrs	3	3 hrs 40 min each
12 hrs	3	4 hrs each
15 hrs	3	5 hrs each
16 hrs	4	4 hrs each
20 hrs	4	5 hrs each

WORKED EXAMPLE • ENHANCED

3 offices, 2 meeting rooms, 2 toilets, kitchen, reception, corridor

SPACE	SELECTION	TIME
Office areas	3 × Medium · 30 min	90 min
Meeting rooms	2 × Small · 15 min	30 min
Toilets	2 × Small · 20 min	40 min
Kitchen	1 × Medium · 35 min	35 min
Reception	1 × Small · 15 min	15 min
Corridor	1 × Medium · 25 min	25 min
Total		235 min

3 hrs 55 min cleaner-time

≤ 5 hrs → 1 cleaner

Whether customer-facing quotes round to a pricing interval is not yet decided.

Every time below represents one cleaner

SPACE	SIZE	ESSENTIAL	ENHANCED	COMPREHENSIVE
Office / work area	Small $\leq 25\text{m}^2$	10 min	15 min	25 min
	Medium 26–60m ²	20 min	30 min	45 min
	Large 61–100m ²	30 min	45 min	65 min
	Not sure	25 min	40 min	55 min
Meeting / conference room	Small $\leq 15\text{m}^2$	10 min	15 min	20 min
	Medium 16–30m ²	15 min	20 min	30 min
	Large 31–50m ²	20 min	30 min	40 min
	Not sure	20 min	25 min	35 min
Toilet / washroom	Small $\leq 10\text{m}^2$	15 min	20 min	30 min
	Medium 11–20m ²	20 min	30 min	40 min
	Large 21–35m ²	30 min	40 min	55 min
	Not sure	25 min	35 min	50 min
Kitchen / break room	Small $\leq 10\text{m}^2$	15 min	25 min	35 min
	Medium 11–25m ²	25 min	35 min	50 min
	Large 26–40m ²	35 min	50 min	70 min
	Not sure	30 min	45 min	60 min
Reception / waiting area	Small $\leq 15\text{m}^2$	10 min	15 min	25 min
	Medium 16–35m ²	15 min	25 min	35 min
	Large 36–60m ²	25 min	35 min	50 min
	Not sure	20 min	30 min	45 min
Corridor / common area	Small $\leq 25\text{m}^2$	10 min	15 min	20 min
	Medium 26–60m ²	15 min	25 min	35 min
	Large 61–100m ²	25 min	35 min	50 min
	Not sure	20 min	30 min	45 min

Not sure rows are derived, not authored: the average of Medium and Large for that level, rounded up to 5 minutes.

REUSE ACROSS COMMERCIAL

Retail & Hospitality, Educational Facilities and Communal Areas run on this same engine. Only the space types, size bands and cleaning-time matrix change per environment.
